URL: <https://trailerking.com/2023-reading-8ft-classic-sl-service-body--zh3n.html>

Price	\$9,567.00
Sales Price	\$8,231.00

Description

Perfect 8ft pickup bed replacement. Add \$1200 for installation

Aluma-Fill(r) Fuel Cup

If they're mishandled, the metal heads of fuel nozzles can quickly damage the exterior of your truck's service body. An all-aluminum fuel receptacle protects the body from accidental nicks and scratches during fueling.

Galvanized Shelves

Designed for heavy-duty usage, galvanized shelves provide 2" dividers for small item storage. Also available: full access between all vertical compartments for more extended tool storage.

Pooched Bumper

Make your vehicle more accessible with an improved bumper. All of our main line service bodies include body-mounted pooched anti-slip surface bumpers which help to prevent falls. Optional lights available.

Powder Coat Finish

A durable, high-gloss polyester powder coat that is electrically bonded to surfaces and melted to form a durable, corrosion-resistant finish. Produces a brighter finish that resists corrosion, chemicals, humidity, scratches, chips and UV damage. Standard on all service body models.

Rectangular Tail Lights

The rectangular tail lights featured on our steel and aluminum service bodies provide a modern look, create clear visibility on the road and offer leak resistance.

Removable Stainless Steel Tailgate Knee Braces

Braces allow the tailgate to swing down completely. Standard on both steel and aluminum service bodies.

Seamless Wheelhouse Panel

Your vehicle often kicks dirt, mud, salt and other grime up into wheel wells while on the road, and buildup can cause damage and corrosion. All of our main line service bodies come equipped with seamless wheelhouse panels to give dirt and moisture fewer places to collect.

Slam-Action Tailgate

Pickup style slam-action tailgate with polished stainless steel handle and double-panel construction. Features stainless steel knee braces, locking rods, hinge rods and striker channels. Knee braces are removable and protect against rust and corrosion while allowing the tailgate to swing down completely. Standard on both steel and aluminum service bodies.

Stainless Steel Rotary Locks With Paddle Handles

Attractive appearance with no exposed fasteners; rust resistant. Features a double-bolted, high quality locking cylinder, adjustable striker pins and an O-ring seal to prevent water intrusion. Standard on all main line service bodies.
